

FROM THE FAIRMONT CENTURY PLAZA REGARDING SUITE TELEVISIONS:

We have a few different TV models in our guest rooms, but this model is the most prevalent LG 65” - 65UT770H0UB

All TVs are a “hospitality” specific model that works with the Sonifi Hotel Entertainment System.

Each room has an **HDMI port at the TV** available for content guests that may want to display from laptop PCs or game stations.

This cable is behind the TV hanging down just to the left of the center. It is hanging just out of site, but you can feel it behind the TV. You will need an HDMI cable to connect to this port.

Guests can use the remote control to channel 97 for HDMI 2.
---

**There is no USB access but attaching an HDMI cable to the port is simple as it located right behind the TV.**

**Staycasting** is also available where guest can use Chromecast compatible apps on phones, tablets, & PCs to cast content to guest room TVs. Casting requires mobile devices and PCs be joined to the “Fairmont” wifi signal in the guest rooms.

- Netflix
- Hulu
- YouTube is currently disabled due to a vulnerability

## Other connections

Connect your TV to external devices. For the best picture and audio quality, connect the external device and the TV with the HDMI cable.

### HDMI

- Supported HDMI Audio format :  
(Depending upon model)  
DTS (44.1 kHz / 48 kHz / 88.2 kHz / 96 kHz),  
DTS HD (44.1 kHz / 48 kHz / 88.2 kHz / 96 kHz / 176.4 kHz / 192 kHz),  
Dolby Digital / Dolby Digital Plus (32 kHz / 44.1 kHz / 48 kHz),  
PCM (32 kHz / 44.1 kHz / 48 kHz / 96 kHz / 192 kHz)
  - DTV Audio Supported Codec: MPEG, Dolby Digital
  - **MENU SETTINGS** ▶  ▶ [Picture] ▶ [Additional Settings] ▶ [HDMI ULTRA HD Deep Color]
    - On : Support 4K @ 60 Hz (4:4:4, 4:2:2, 4:2:0)
    - Off : Support 4K @ 60 Hz 8 bit (4:2:0)
- If the device connected to Input Port also supports ULTRA HD Deep Color, your picture may be clearer. However, if the device doesn't support it, it may not work properly. In that case, change the TV's [HDMI ULTRA HD Deep Color] setting to off.
- This feature is available only on certain models which support HDMI ULTRA HD Deep Color.

### USB

- Some USB Hubs may not work. If a USB device connected through a USB Hub is not detected, connect it directly to the USB port on the TV.
- It is recommended that you use a USB hub or USB HDD with a power supply. (If the power supplied is not sufficient, the USB storage device may not be detected properly.)
- It is recommended that you use an external USB HDD with a rated voltage of 5 V or less and a rated current of 500 mA or less.

## External Devices

Supported external devices are: Blu-ray player, HD receivers, DVD players, VCRs, audio systems, USB storage devices, PC, gaming devices, and other external devices.

- The external device connections shown may differ slightly from illustrations in a manual.
- Connect external devices to the TV regardless about the order of the TV port.
- If you connect a gaming device to the TV, use the cable supplied with the gaming device.
- Refer to the external equipment's manual for operating instructions.
- In PC mode, there may be noise associated with the resolution, vertical pattern, contrast or brightness. If noise is present, change the PC output to another resolution, change the refresh rate to another rate or adjust the brightness and contrast on the [Picture] menu until the picture is clear. Depending upon the graphics card, some resolution settings may not allow the image to be positioned on the screen properly.
- When connecting via a wired LAN, it is recommended to use a CAT 7 cable.
